Our Exosome cream is an elegant oil-in-water vanishing cream formulated for enhanced transdermal penetration. This elegant and effective formulation with added emollients, provides a better rubin and longer-lasting moisturization without irritation. It is intended for topical use only to help reverse aging defects among other regenerative benefits offered by pure and high potency mesenchymal derived exosomes.

Benefits:

- Free of BHT, EDTA, parabens & urea
- Enhanced penetration capability
- Hydrophilic & lipophilic compatibility
- Validated transdermal penetration & beyond-use dates (BUD)
- Natural ingredients
- Cosmetically elegant - lasting moisturizing effect
- Applies easily - no sticky residue
- Free from harmful additives, perfect for the conscious consumer
- Delivers a luxurious, long-lasting moisturizing experience.

Recommended Use:

Our Exosome cream serum should be applied at night time before resting. No vigorous physical activities are recommended for minimum 3-4 hours after applications. Exosome night cream serum can be used in conjunction with derma rollers but not required. Avoid direct eye contact, should this happen rinse eyes thoroughly.
