

EXOSOME + GHK-Cu NIGHT CREAM

5 TRILLION+
Exosomes per application

99.7% PURE
GHK-Cu peptide concentration

1%
Full therapeutic concentration

4,000+
Genes modulated by GHK-Cu

OVERNIGHT
Optimized for nocturnal repair

THE SCIENCE

GHK-Cu PEPTIDE — GENOMIC LEVEL ACTION

A naturally occurring copper peptide that modulates over 4,000 genes linked to collagen synthesis, inflammation control, and tissue remodeling. Nyoteni uses GHK-Cu at 99.7% pharmaceutical purity at a full 1% concentration — the clinically meaningful threshold.

- Stimulates collagen I, III & elastin synthesis
- Activates antioxidant defense enzymes
- Reduces matrix metalloproteinase (MMP) activity
- Promotes barrier repair & wound healing
- Firmer architecture, reduced fine lines & laxity

MSC EXOSOMES — CELLULAR COMMUNICATION

Mesenchymal stem cell-derived exosomes deliver entire biological programs — growth factors, microRNA, anti-inflammatory cytokines — that trigger multi-pathway regenerative responses. 5 trillion+ exosomes per application.

- Carries EGF, FGF, VEGF, TGF- β growth factors
- MicroRNA sequences for gene expression support
- Accelerates post-procedure healing & recovery
- Reduces inflammation and redness
- Enhances fibroblast & keratinocyte activity

TRANSDERMAL SYNERGY

Nyoteni's transdermal delivery matrix is engineered to move both actives beyond the stratum corneum — ensuring they reach the dermal environment where regeneration occurs. Not surface skincare. Skin science at depth.

CLINICAL + COSMETIC BENEFITS

COSMETIC & SKIN WELLNESS BENEFITS

- Improved skin hydration and moisture retention
- Visibly revitalized, radiant-looking complexion
- Enhanced appearance of firmness and elasticity
- Smoother, more refined skin texture
- Reduced appearance of dull or fatigued skin
- Overnight nourishment and recovery support
- Reduced fine lines and surface irregularities
- Supports long-term skin wellness with consistent use

SUGGESTED PROFESSIONAL APPLICATIONS

- Post-procedure take-home for microneedling, laser & aesthetic treatments
- Nighttime facial care within clinical skincare programs
- Integration into exosome & peptide-focused aesthetic regimens
- Targeted care for dry, dull, or visibly aging skin
- Premium daily maintenance for discerning patients

FORMULATION & COMPLIANCE

- Free of BHT, EDTA, parabens & urea
- GMP Certified | FDA Regulated Tissue Bank Facility
- Manufactured by CureHealth Labs | USA Made
- Apply nightly — compatible with derma rollers

IDEAL PRACTICE SETTINGS

- Med Spas — post-treatment recovery & take-home protocols
- Dermatology — clinical skincare for aging, texture & barrier
- Plastic Surgery — post-procedure healing complement
- Wound Care — exosome-driven regenerative support

WHAT CLIENTS EXPERIENCE Timeline of visible results with consistent nightly use

WEEK 1

Increased hydration, softer texture, surface refinement

WEEK 2

Visible radiance + elasticity, fine lines begin to soften

WEEKS 3-4

Improved tone, firmer feel, scars & dullness fading

MONTH 2+

Cumulative regenerative effects — resilient, luminous

"My skin gets firmer, fine lines and dullness began to fade. Nyoteni has delivered both clarity and anti-aging benefits in one."

— Pascal Higbie, Owner, Hy Anti-Aging

"Exosomes have been at the forefront of recent research and I'm excited to see formulations that actually deliver results. Nyoteni harnesses the power of exosomes to promote cellular regeneration."

— Evgeniya Rakitina, MD, MSGM
