STABILITYBIOLOGICS®

AmnioCore SL

AMNIOTIC MEMBRANE ALLOGRAFT - SINGLE LAYER

Allogeneic amniotic membrane allograft for use as a barrier and applied as a covering.

- Dry Storage - no cryopreservation necessary
- Large graft sizes with repositionable design
- Level II HCPCS Code Q4367

AmnioCore SL

AMNIOTIC MEMBRANE ALLOGRAFT - SINGLE LAYER

STABILITY® BIOLOGICS

About AmnioCore SL: AmnioCore SL is a single layer, allogeneic amniotic membrane allograft for use as a barrier and applied as a covering.

Stability's proprietary processing method results in large graft sizes with repositionable design and excellent handling properties. This allows for easy manipulation and results in a dependable, flexible allograft that is ideal for use as a barrier and applied as a covering.

Why Amniotic Tissue?: Amniotic membrane has been used clinically as a wound covering for over 110 years with more than 100 publications to date describing the various potential benefits.[1] Amniotic membrane contains essential growth factors and provides a natural human tissue scaffold that may provide a wide range of advantages as a covering according to published literature. Amniotic membranes are widely used as a covering in a multitude of applications.

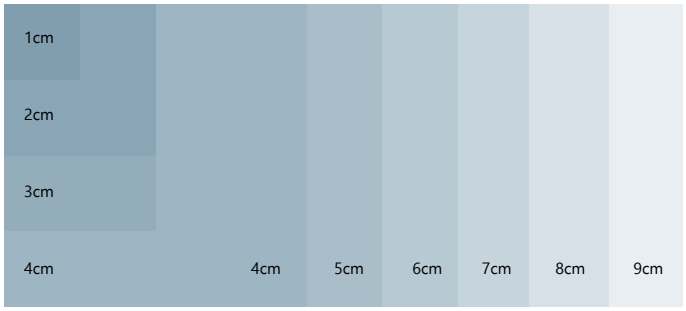

Safety: AmnioCore SL is comprised of donated human tissue that has been screened, recovered, and serologically/microbiologically tested at CLIA certified labs in full adherence with State, FDA and AATB requirements. Stability Biologics products are manufactured under strict controls, are subjected to validated liquid disinfection and terminally sterilized with a validated sterilization process to ensure all products meet a SAL of 10^{-6}. Stability is FDA registered, AATB accredited and licensed by all applicable states. Stability maintains the highest standards to ensure all products are of the highest quality, safety, and effectiveness.
